Note: South Heartland District Health Department includes the four county LHD region of Adams, Clay, Nuckolls, and Webster Counties

Note: Data reflect both landline and cell phone responses

Note: This table is not intended to be inclusive of all BRFSS indicators; some were excluded due to small numbers at the LHD level

Note: This table excludes 2011 BRFSS optional module and state added questions data due to the data being landline only

Note: The results in this table may be slightly different than results in previously published reports and tables due to differences in the software used, how the statistical analysis code was written, or suppression rules; these results were analyzed using SAS and SAS-callable SUDAAN software

^a Non-weighted sample size among adults 18 and older (unless different age group noted)

^b Weighted mean, median, or percentage (percentages are followed by the % symbol) among adults 18 and older (unless different age group noted)

^c Low and High are the lower and upper limits of the 95% confidence interval, respectively

^d Symbols represent: "+" = LHD value significantly higher than the state value; "-" = LHD value significantly lower than the state value; "NS" = LHD value not statistically different than the state value; significant differences based on 95% confidence interval overlap

^e Indicates whether there is a significant difference by gender within the LHD region, based on non-overlapping 95% confidence intervals; Note: small sample size for males or females can make interpreting significance difficult due to large confidence intervals

[^] Reflects a Nebraska Healthy People 2020 (HP2020) measure

* Unstable estimate, use data with caution; relative standard error \geq 30% or confidence interval half-width \geq 10.0

** Data suppressed due to sample size < 50 respondents

[^] Visible data are not comparable to earlier years due to changes in question wording
