

JYNNEOS VACCINE ELIGIBILITY

Use the form below to assess your eligibility to receive the JYNNEOS vaccine to prevent monkeypox virus infection (MPV). JYNNEOS is a vaccine indicated to prevent both smallpox and monkeypox disease in adults 18 years of age and older who are determined to be at risk of infection. **Note: Vaccine quantities are limited at this time**

The following set of questions are about your sexual health and potential exposures to monkeypox virus. Throughout this assessment, sex is defined as vaginal, oral, or anal sex. Close intimate contact includes cuddling or kissing.

Risk Assessment:

In the past year, have you been sexually active or had close intimate contact with (mark all that apply):

- Men
- Women
- Transgender (male to female)
- Transgender (female to male)
- Non-binary/gender fluid people
- None of the above

- In the past year, have you been diagnosed with a sexually transmitted disease?
- In the past 21 days, have you had sex or close intimate contact with someone you met through an online dating or social networking application "app"?
- In the past 21 days, have you had direct skin-to-skin contact or sexual contact with an individual with confirmed monkeypox?
- In the past 21 days, did you attend an event/venue where there was a confirmed monkeypox case? (Did you hear on the news or were you notified by a venue that you attended an event with a confirmed monkeypox case?)

If you answered yes to any of the above, please contact your health care provider or the health department about your eligibility for the JYNNEOS vaccine.

If you are a close contact to an individual with confirmed monkeypox, please contact the South Heartland District Health Department for confidential discussion of further recommendations. If you are not a resident of Adams, Clay, Nuckolls or Webster Counties, please contact your local health department:
